Effects**

Used in almost any location, the semi-transparent **Adview** can change a shopfront into a live presentation of your products or a stunning entry feature to any corporate foyer.

Adview, a semi-transparent film surface used for rear projection. There are no pixels, grids or distracting seams to decrease image quality and you can place the projector at any angle while still achieving maximum performance.

Adview gives you unprecedented flexibility in design and uniqueness in visual presentations.

The ultra-thin **Adview** film provides a sharp crisp image when applied to shop-front glass or acrylic panels. The effect is sure to attract attention to your business.

Adview is only 0.105mm thick, available in 65% transparency with standard widths up to 2.1 metres wide. Available in 4:3 and 16:9 ratios.
