

ADVIEW Projection Film PATENTED

**Vibrant Image
on Both Sides**

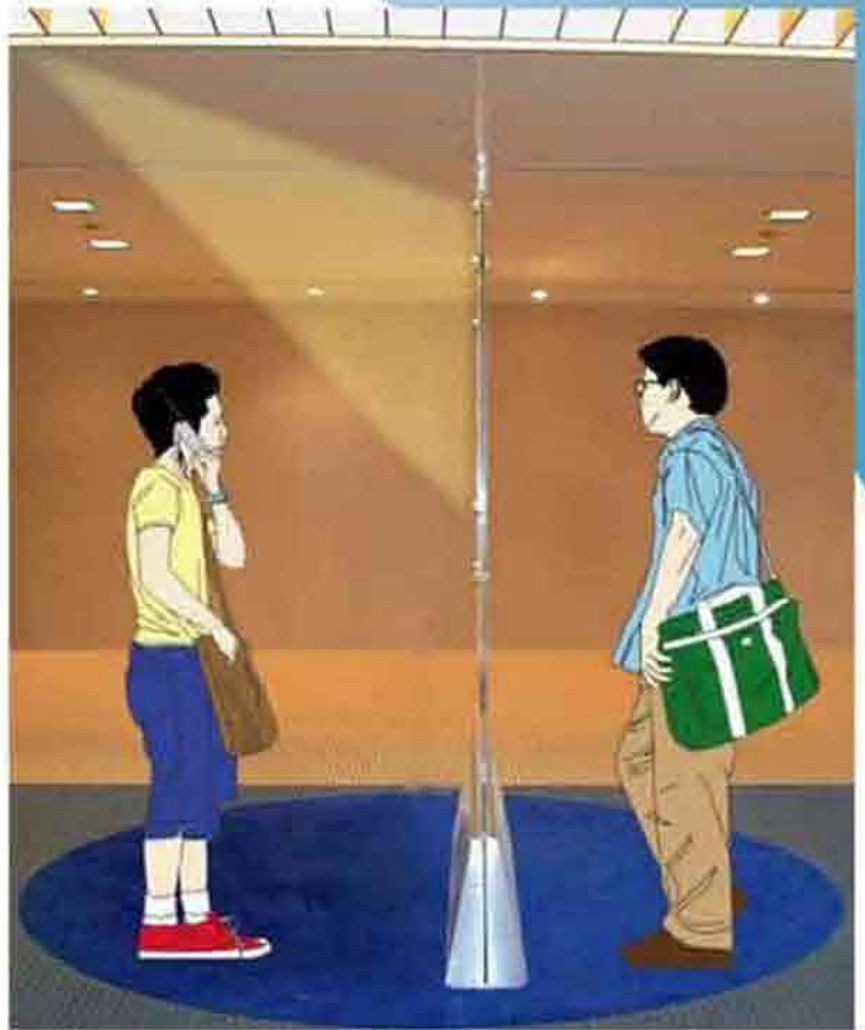

Front Projection

Rear Projection

**Front & Rear
Projection**

Stunning Quality

**Increased
Product
Awareness**

Also for Special Effects & Control Rooms

Why buy two when one will do? **Adview** gives your customers an image on both sides.

The special construction of the **Adview** film allows you to show the same image on both sides with only one projector.

Smart graphics allows you to rotate text so that customers on both sides see your messages to full advantage.

The ultra-thin film is only 0.3mm thick, with standard widths up to 2.1 metres wide and is available in 4:3 and 16:9 ratios.

Adview can be used in special effects, retail and corporate environments or control rooms.

Can be used as rear projection, front projection or both sides at the same time.
