WITH VIBRANT MESSAGE DELIVERY
AND STUNNING QUALITY USING OUR REAR PROJECTION FILMS

The RollUp Wall is a modular display system that features adjustable height poles that support a top tube containing a retractable rear projection film. The top of the graphic is fixed to a self adhesive strip on a leader in the same manner as normal RollUp displays. A pocket needs to be formed on the base of the graphic to hold a rod that hooks onto clips at the base of each stand.
